

Report Manager

External USB interface for BAUR oil testers

Professional measurement data management for insulating oil testing

- Automatic export of measurement logs and generation of reports as PDF and text file
- Reports in various languages with customised logo

Report Manager, the external USB interface for oil testers, is used to automatically export measurement logs from BAUR oil testers to a USB drive. Extensive language support and the integration of customised logos simplify professional reporting.

Functional principal

The Report Manager is connected to the USB port on the oil tester and uses the logs available in the oil tester and new logs to generate both a PDF file and text file that it saves on the USB drive.

Features

- Automatic generation and saving of the measurement reports on a USB drive:
 - In PDF format with measurement diagram
 - As a text file
- Measurement reports in up to 13 languages
- Easy to use – simply connect and insert USB drive.
- Suitable for the following BAUR oil testers:
 - DPA 75 C
 - DTA 100 C
 - DTL C
