

Design Seminars across manufacturers

Every measurement technician knows the requirements they have to deal with in their environment. Here, we want to showcase common measurement methods independent of manufacturers, to provide even more knowledge for the confident handling of more challenging tasks.

Our speakers are distinguished by extensive experience in the field of cable measurement technology, especially cable fault location and diagnostics. They promise comprehensive knowledge transfer and the answering of individual questions related to cable measurement technology.

„Regular training promotes continuous advancement. We make these training courses an unforgettable experience.“

BAUR Global Academy

Seminar SPAIN 2025

Date and course contents

Advanced course Cable testing and diagnostics

14th - 16th October 2025 in Barcelona (Spain)

Professionals from energy supply companies, municipal utilities, service providers, and network operators in the medium-voltage cable sector who are already using cable diagnostics, are interested in cable diagnostics, and/or want to learn more about condition-based maintenance

€ 1.900,- per person
price per additional participant from the same company: € 1.850,-

Seminar language: English & Spanish

Course content:

How can I increase the efficiency of my cable network?

Testing and diagnosing cables, identifying weaknesses, preventing cable failures

- Overview of cable diagnostics: Cable sheath testing, VLF TanDelta measurement, VLF TE measurement, VLF Monitored Withstand Test
- Advantages and differences of online/offline diagnostics
- Standards and application areas of testing and diagnostics
- Application know-how, practical use
- Demonstrating the commercial benefits of condition-based maintenance
- Strategies for establishing cable diagnostics
- Exchange with professionals from other companies
- Experience reports

Participants will be enabled to assess and evaluate the operation of test equipment and cable measurement vehicles in terms of technical, organizational, and personal safety measures.

The seminar location

The seminar will take place in Barcelona – a lively city with a Mediterranean lifestyle. For the theoretical part of the seminar, we have chosen a hotel located directly next to the test track. This hotel also serves as comfortable accommodation for the duration of the seminar week.

The practical sessions will be held directly on the Martin BAUR test track – ensuring short distances and ideal conditions for hands-on learning.

Barcelona offers numerous opportunities for relaxing leisure activities after intensive seminar days. On two evenings, we warmly invite you to a joint dinner with an evening program, giving you the chance to experience the regional cuisine and explore the local surroundings.

Barcelona,
Spain

You can find further information and the digital registration form at www.baur.eu/en/academy

Registration

To register your place on one of our seminars, go to www.baur.eu/en/academy-registration

We are committed to efficient learning and sharing experiences in small groups. As a result, the number of seminar places available is limited. Upon completing the form, you will receive confirmation of your registration.
